SMART IN THE COLLEGE CLASSROOM

INTRODUCTION

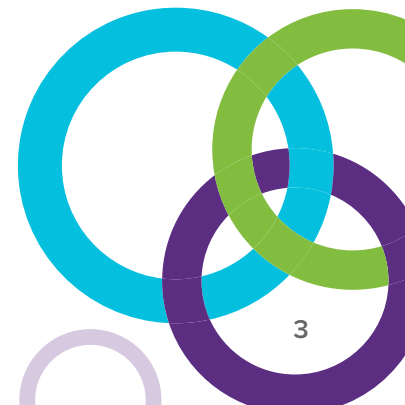

Smart Technologies has prepared this booklet to give you, the college professional, some ideas on how to incorporate SMART technology into your classroom. The ideas in these pages are meant to inspire you, to foster interpersonal collaboration and to make the classroom a fun place.

IDEA #2: MAKE PRESENTATIONS INTERACTIVE

You can make your class presentations interactive by writing on the slides. Students having trouble following in your financial accounting class? Underline, circle, use clip art during your presentations to highlight information and keep presentations engaging. Teaching upper math? Put problems in your presentation, then solve them right on the presentation. The best part? Save your presentation with your writing in it and upload it to your students as a pdf, so they can study later.

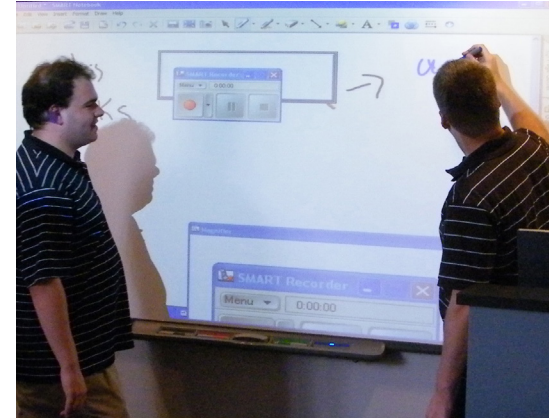

IDEA #3: MAKE LESSONS INTERACTIVE
